- ▶ Save a payment method for convenient autopay

Visit www.DriveKS.com to order a KTAG, manage your account and for more information.

KTAG / *pay the* **LOWEST** toll

About DriveKS

- ▶ DriveKS is Kansas' toll payment system, which supports cashless tolling and will also support KDOT's express lanes on US69 in 2026.
- ▶ DriveKS accounts require license plates. Transponders are optional but provide the lowest toll rate - 50% less than without a transponder.
- ▶ DriveKS accounts can support transponder and image-based transactions on a single account.
- ▶ KTAG accounts automatically converted to DriveKS accounts when cashless tolling began on July 1, 2024.

- ▶ DriveKS creates an account for customers who do not have one at the time of travel, using the vehicle's registration information.

- ▶ Customers whose license plates are associated with toll violations between 2020-2024 may have an established DriveKS account and may receive an error if trying to set up a new account through a self-service platform.

- ▶ KTA has Kansas-based customer service teams in Wichita, Topeka and Lawrence.

- ▶ DriveKS accounts that have a payment method saved can temporarily add a rental vehicle for travel in Kansas.
